

## Scanner Killer Technology - One Scanner to Rule them All

Helmut KUNGL  
XYZ RGB Inc.\*, Ottawa, Canada

### Abstract

XYZ RGB's revolutionary new 3D Body Scanning Technology does what no other body scanner can. By acquiring a FULL 360 degrees of information instantaneously our systems boast far higher accuracies, depth of color (up to 8K), true pixel-to-point registration and allows for the scanning of animated postures that simply aren't attainable through other scanning solutions. Our full body scanners are fully portable setups that configure onsite in only a few hours and may be operated by a single technician.
